Market Trend for CCISD

Chart below showing the relationship of number of homes sold each month compared to the number of homes for sale that same month. 2017 made a dip in November and December. 2018 starting off slow. More than ever, you need the help of a full time professional Realtor that understands the market. Call me for a personal evaluation. (281-910-2001)

Listed below are residential home sales monthly in the Clear Creek ISD, and a yearly comparison. NASA has been hit hard, but rebounding, and new business development around Clear Lake is going strong. We should be encouraged with all the new business that is coming in to the area. Let's hope the new jobs are high paying ones. With fewer homes on the market, and increased sales, the market remains a seller's market. We need more inventory to return to a balanced market. Strong markets in either direction are NOT a good thing.

Price levels took a dip in 2017. The price level declined in Nov and Dec, and continue in Jan. The market basic of too little inventory (supply) to meet need (demand) will continue to force median prices up. Prices are still high. **NOW is the time to put your home on the market.** Want to know how to get your home ready to SELL, call, text, or email me.
